ETIKA's Range

Our 7 wedges

Our Management provides tailored solutions aimed at the specific needs of our Clients through a deep analysis of the information provided for a 360° consulting strategy. Our business model allows us to have the flexibility to express the best possible result.

Sustainable Business Development

Core Business Units

Global Debt Collection

No matter where the debtor is located, we address him directly from his home country, in the local language and with the best possible strategy.

Network solution management

Our international Network allows a deep coverage of countries and services. In compliance with EU regulations, we can retrieve and manage high volumes of data.

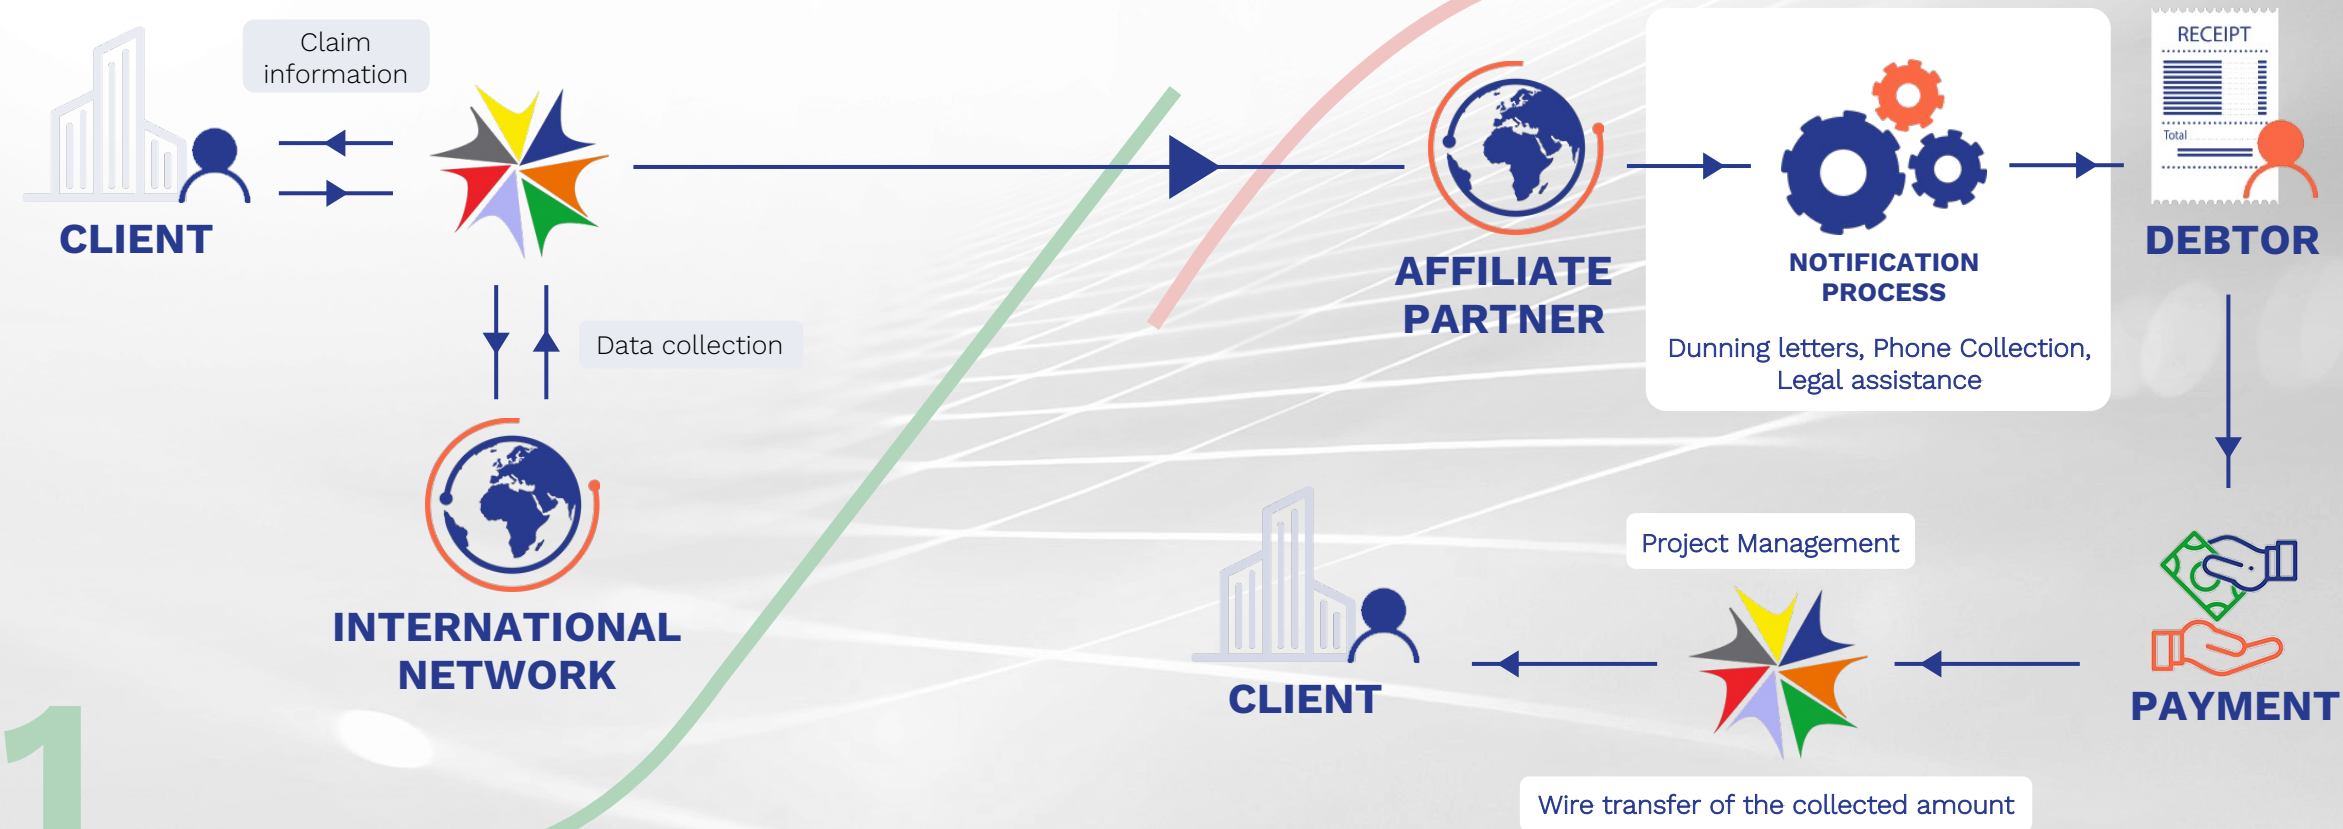

Real Estate Management & Consulting

Legal, technical and administrative activities, as well as strategic orientation for public and private investors. With our local expertise and global experience, we generate value across all real estate aspects.

Global Debt Collection

Process 1 and 2 can be kept separated. Our Clients choose between the sole information and data collection (1) or the entire debt collection management (2).

Network solution management

Sustainable Business Development

RELATIONSHIP MANAGEMENT

Managing both the established network and enhancing new key connections in strategic areas. The aim is to improve and leverage the relations with all the stakeholders, including Providers, Clients and other Companies in the common environment. Building trust, solidifying rules and meeting expectations.

BUSINESS INFORMATION

Integrated research system, collection and analysis of information from public and investigative sources, that solve all kinds of collecting data issues.

Through our technology and international Network, we can obtain information from debtors in a short time and manage high volumes.

Real Estate management & Consulting

Our company is specialised in providing solutions to assist our Clients. We optimise their real estate portfolios and we help with any kind of support from property acquisition, to financial analysis and asset management.

We offer a wide range of services designed to meet the unique needs of our Clients, including:

**Due
diligence**

**Market
research**

**Strategic
planning**

**Operational
improvements**

Our work develops a comprehensive real estate management plan, that is customised for specific goals and clearly defined targets..

Whether you're a real estate investor, property owner or developer, our team has the knowledge and expertise to help you succeed. With our guidance, you'll be able to make informed decisions about your real estate assets and achieve the best possible outcomes.
